Role of FIGO Nomenclature

AUB - L ; Leiomyoma

- 1ry level: AUB-L
- 2ry level: Submucosal - AUB- L SM
- Other - AUB - L O
- 3ry level: Types 0 - 8

As a result, in order to obtain clearly informative physics, as well as translational and clonic research, a comprehensive approach to both research and categorization was needed. Woolcock JG; Critchley HO Munro MG; MS Broder; Fraser IS (2008). The first was a disjointed set of ill-defined and inconsistently used terms and definitions that undermined effective communication between researchers, clinicians and trainees[5]. The second was the absence of a system of classification of potential causes, or contributors to AUB symptoms in a specific patient. 10 (3): 183 A. 94. Seminars in Reproductive Medicine. Determining the causes of AUB in reproductive years remains a major challenge for researchers, clinicians and educators. Munro MG (2010). International Journal of Gynecology and Obstetrics. doi:10.1093/ijgy/del476. pp. 2269-2698. To a large extent, the process has been iterative involving the FIGO Menstrual Divide Committee, as well as a host of guest contributors: epidemiologists, gynecologists, and other experts in MatA rria from all over the world between 2012 and 2017. Such women are 30% less productive at work, and consequently suffer a similar reduction in income[1][2]. For low-resource mothers, the combination of poor nutrition, lack of access to simple iron replacement therapy and the symptom of intense menstrual bleeding (HMB) are collectively responsible for the global epidemic of iron deficiency anemia, a circumstance that creates a vulnerable population peri-partum hemorrhage and its sequelae, including death. Abnormal uterine bleeding in reproductive years comprises a complex set of disorders which include abnormalities in uterine, endometrial and haemostatic endfunction and a series of structural abnormalities including polyps, adenomyosis leiomyomas or uterine leiomyomas. 22 (3): (3) saw taht - isonigaid a ton(motpmys a - BMH mret eht fo noitpoda eht saw snoitinifed fo tes siht ni dedulni J7[16].seiduts lacigolimedipe elacs-egril ebalialva eht morf selitnecrep %59 ot ht5 eht gnisu gnideelb eniretu lamronba dna lamron fo erutalcnemom dna snoitinifed htob dedivorp taht eno ;metssys OGIF tsrif eht ni detluser sseocp siht ypareht dna noitagitsevmi reporp setatitcaht taht BUA gndnatsrednu rof msinahcem a gndivorp fo ksah eht htiv derembucne era swollef dna stnedisr sa hcus seaniart etaudartpsop dna stneduts lacidem fo srotacude dna latpsop ro eciffo rieht ni tneitap eht htiv laed tsum snainicic; noitagitsevmi lacidem dna hcnep traveler etuceke neht dna evienoc od evah srotagitsevmi .5A .on .28A .loV .sserP ytsirevniU egdirbmaC .egdirbmaC .J7002 .ssocorp ihpleD s'DNAR gnisu detudnoc saw sseocp a nopu desab trap egral ni saw smetsys eseht fo tnempeleved eht sraey evitucidorper eht ni BUA fo sesuac fo noitacifissalC dna smret fo erutalcnemom fo smetsys OGIF eht J7[16].noitahs citametsys a ni seussi eht elkerot deibnessa erew senecis lacimile dna .lanoitalsart .csab eht morf sevlatneserper dna .slanruoj lacidem cigolocenym dna selitecos lanossefor detaler .ADF eht morf esohi desirpmoc taht strepxe fo puory a .5002 ni gnitras .11823571A .ADIMP .x.86100.7002.3374.4251.j1111.01.i0d .de .CaHYN ecnelceceE ~ ygolocenY3 dna scirtetsBO .67AA664 J3J 78 .setats detit eht ni ssol laurtsnem desacerri htiv detaicossa secivres htiaeh fo esU". 5667821-1300-s/5501.01.i0d .j1102(SI resarF .SM redorB .OH yelhticrC .GM ornum b a ~ .seussi htiaeh s'nemoW .laA .te .MD shacwintets .AM kralC :DK ktrIF ~ .segnelhae eseht htiv gnialod of stemidepmi rojam owt tsael ta erew ereht taht tnerappa emaceb et .srotacude dna srotagitsevmi fo rehmun a roF .gnideelb eniretu lamronba fo stceffo dna sesuac etadicule of snoitagitsevmi rof deen eht".)7002(M redorB :GM ornum :OH yelhticrC :SI resarF c b a ^ by the National Institute of Health and Central Excel as "excessive loss of menstrual blood, which interferes with the physical, social, emotional and/or maternal quality of life of the woman" µ 19. PARAGRAPH 1: 70A .8B. "Transcervical ^ of submucosal fibroids for abnormal uterine bleeding: results on the degree of intramural extension". It was in this context that the FIGO (International Federation of Gynecology and Obstetrics) Working Group on Menstrual µ was created. 188(2): 343A .8B. Coagulopathies need to be confirmed by laboratory tests, whereas, at least for the present, they are µ ^ 3 .ovulatA The total direct and indirect annual costs of the AUB are estimated to exceed 37 billion µd^homes[3]. There is evidence that even in developed countries only about half of those affected are actually seeking care and that many people are not satisfied with the results[4]. For many, hysterectomy remains a common therapy for those who have access to No. The result of this process was an almost unanimous decision to create a new set of descriptive terms and inequavocs that could be translated into a wide spectrum of languages. µ Munro MG; Heikinheimo The Haththotwura R Tank Jd; Fraser IS (2011). The first of these systems of nonsubclassification A .Aais for leiomyomas (Figure 3), recognizing their prevalence and the existing classification system for submucosal leiomyomas, first published by Wamsteker et al[11] and subsequently adopted by the European Society for Human Reproduction and Embryology (ESHRE). It is important to realize that many of the structural anomalies do not contribute to the symptoms of the patient A .A "Financial and quality of life charge of dysfunctional uterine bleeding among women agreeing to gain surgical treatment". The results allowed collective recognition of the disparity and inconsistency in definitions and terminology, a circumstance that was a surprise for many. Pmidn. 21345435. "Confusion review in current and historic terminology and definitions for menstrual bleeding disturbances." References ^ Cote I, Jacobs P Cumming DC (2003). "The FIGO Classification System (" Palm-Coein ") for Cause of Abnormal Uterine Bleeding in Non-Gravid Women. In The Reproduction Years, including Guidelines for Clinical Investigation". Vol. 90, No 6. "A process designed to lead to an international agreement on terminologies and definitions used to describe menstrual bleeding anomalies." These circumstances lead to difficulties with the interpretation of both the basic scientific research and the clinical trials, since species and patients may be "contaminated" with potential confused. "Prevalence of heavy menstrual hemorrhages and experiences of women affected in a European patient research". Symptoms often interfere with the quality of life and those girls and women suffering from Aub Crónica spent significant amounts of personal resources in menstrual products and medicines. The irregular ovulation or anovulation can be supported by a system of laboratory and histopathological evaluations, which are not normally applied in clinical contexts. Abnormal uterine bleeding (AUB) in reproductive years, not related to pregnancy, rarely psar life at risk, but is often altering. "Can we achieve an international agreement on terminologies and definitions used to describe abnormalities of menstrual bleeding?". "A systematic review evaluating the quality of life related to health, commitment labor, health costs and use in abnormal uterine bleeding". µ Fraser IS; Mansour D Breyman C Hoffman C C sona son JBUA(lamrona aniretu aigarmomh ed sasuae sad ofeSÁaccifissalC a arap NIEOC-MLAP ametsis O .3 A.on .821 A.loV .socinÁlc sodadiuc .e .ofeSÁAcude .ofeSÁAgitsevmi a ratificai arap sovitudorper sona son BUA oa setnacibus siaicnetop sasuae sa racifissalcbus e racifissalC e lamrona e lamron aigarmomh ed samotais ed seipSÁinifed sa razinomrah are ovitcejbo O "asnetni laurtsnem aigarmomh" .110.11.0102.ogji./6101.01.i0d .72356022 .ADIMP .acinÁlc aicnÁveier mahnet euq atiepsus uo ebas es euq sopurghus riuleni edop siaicnirp sairogetac sad amu adac euq es-ecchnocer .adamitserbos res edop ofeAn serzafic e sorages socinÁlc sodadiuc ed aicneÁveler a .ocinÁre omoc oduga BUA od otat laidnum otcapmi emrone o moc .ygolocenY3 dna scirtetsBO fo lanruoj nacirima. 98711191 .ADIMP .j9002 .sosoresbus amoino ed sopit soitrÁv so e siarumartni samoinioel so arap ofeSÁaccifissalcbus e .j3 optI(lairtemodne edadivac a mecrotsid ofeAn sam oirt©Ámónde o moc otacnoC meaz ef sosocumbus samoin so arap airogetac amu adanoctioa ioF .is me asuac ofeAn .amoinis od BMH saicnÁAugesnoc sad ofeSÁAuder a moc madli sadanoiclar saiparet e satse .otnemivlonnesed me sesAp son sievÁnopsidni etnemeteuqerf e sodivlonnesed sesAp son sadazilitubus etnemeteuqerf majes orref od aiparet a omoc motoc onses ed seipSÁAnevretni arobmE .sailAmaf saus sa e serelhus sa omoc missa .serodagerpmo so .amoino e agerracerbos BUA ad amelborp O .320.10.7002.trestntref.j/6101.01.i0d .0766972001=didlo&gnideelb eniretu fo noitacifissalC .OGIF=elitt?php.xedni/w/gro.aideplkw.ne/:sptth" me oditbO .62540271 .ADIMP .)sacin©Ágortat .siaitemodne seipSÁAabrutrep .sairÁAtaluv seipSÁAabrutrep .saitapologuoc sievÁnifed etnemlaruturte ofeAs ofeAn eAIEOCeÁ seipSÁAcifissalC sa euq otanauqe .)aisalprepih e edadngilam .samoinioel .seimoineda .sopiÁp acigÁlotatopsih ofeSÁailava uoe megami rop sadinifed res medop euq seipSÁAabrutrep medneerpoc eÁMLAPeÁ sairogetac sÁ .29.3002.bom/7601.01.i0d .j5102(F aigartep .A © Á sovitudorper sona son BUA ad aicnÁlaverp A .edÁAs an rolaV It is estimated that it affects 30% of all women at some point in their lives. Approximately 5% search each year; and up to 30% of all visits to gynecologists are for a symptom of AUB. What now the nomenclature system and definitions of figo has undergone very modest modifications that will continue to be modified and revised as appropriate. [7] The classification system, known by the acronym ÁeÁ- ÁPalm-coein á-, was developed and published for the first time in a book, and then, after ratification by the Working Group, was accepted by FIGO in 2010 and finally published together with the Nomenclature and Definition System in 2011. [10] Each of the first eight-letter letters is © a category of discernible disorder, potentially found in an individual with a symptom of AUB (Figure 2). The classification á- ANÁe á-á-Áe á-ANÁe á-Á-á- (the classified) is reserved © for entities that are rare or indeterminate with the symptoms of AUB. In 2011, FIGO recognized two systems designed to help research, educate and clinical care of women with abnormal uterine bleeding (AUB) in reproductive years. Face-to-face meetings were held in Rome, Vancouver and Singapore, and were augmented by a series © of teleconferences and other communications designed to evaluate various aspects of the systems. Fig system 1. The systems are designed to be flexible and to be revised periodically as appropriate. PMID 12592237. Doi: 10.1016 / j.whi.2008.07.002. The system of definition and nomenclature of normal and abnormal uterine hemorrhage (AUB) in reproductive years. Human reproduction. This page is a © summary of the systems and their use in contemporary gynecology. pp. 736 Áe á- "40. To review, clarify and, where appropriate, review previously published systems. µ 196 Áe á- "200. Fig System Background 2. ^ Z; Doan qv; Blumenthal p; Dubois RW (2007). Pmid 17362717. ^ wamsteker k; k; MH; Kruij JH (1993). The systems of the International Federation of Gynecology and Obstetrics (FIGO) for the nomenclature of symptoms of normal and abnormal uterine hemorrhage (AUB) in the reproductive years (FIGO AUB System 1) and for the classification of causes of AUB (FIGO AUB System 2; PALM-COEIN) were published together for the first time in 2011. The 2011 publication.[10] as well as other publications authored or coauthored by the FIGO Menstrual Disorder Working Group, also explicitly included the investigation process - that is, since the identification that a patient actually has one or more symptoms of AUB (FIGO AUB System 2) at classification of your condition as classified by the FIGO 2 System, the PALM-COEIN System[12] The systems were supported by various national µ, including the American College of Obstetricians and Gynecologists (ACOG Practice Bulletin 128). 29 (5): United Kingdom: National Institute for Health and Clinical Excellence. The International Federation of Gynecology and Obstetrics (FIGO) is an international organization that links about 125 international professional societies of obstetricians and gynecologists. 113 (1): 3-13. The participating members of the FIGO Menstrual Disorder Commission, 2015-2018 are listed at the end of the document. Fertility and Sterility. When substantial amendments were considered, an ^ vote was used, in some cases using a modified RAND Delphi Technic µ.
